10 February 2020

Dear 

Case Ref: WP/ENF/20/00009
Nature of Enquiry: Erection of Electricity Cabinet
Location: NORTHERN PART OF FIELD KNOWN AS TREVETTS,
RIDGEWAY NORTH, UPWEY, WEYMOUTH

I refer to our previous correspondence regarding the above mentioned development.

I have now investigated the alleged breach and I can advise that Scottish and Southern Electricity Networks, contacted the Local Planning Authority under ref: WP/18/00183/NOTS, dated 6 March 2018, with regards to the placing of 50kVA 3 phase supply in the field.

The SSE were formally advised that the placing of the supply was considered permitted development under Part 15 Class B (a) of the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended).

I have spoken with SSE this morning and they have advised that further works are likely to take place, but carried out by the owner, to delineate an area of land approx 4m x 4m around where the supply is placed. This is required by SSE as part of an agreement with the owner and may be in the form of fencing or other means of delineation. As long as any fence or similar is no greater than 2m in height such works would also be considered as being permitted development.

Therefore, it is not intended to take any further action with regard to this matter, and I will treat the case as closed. I thank you for bringing this matter to our attention.

Yours sincerely

Neil Dackham
